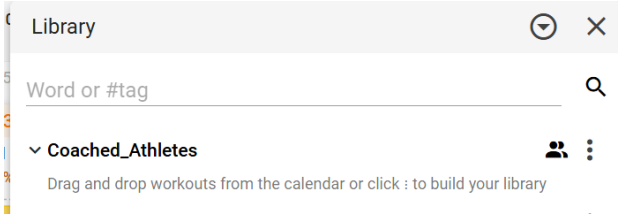
👫 Coached Athletes — Montis.icu Setup Guide

1️⃣ Create the Required Folder in intervals.icu

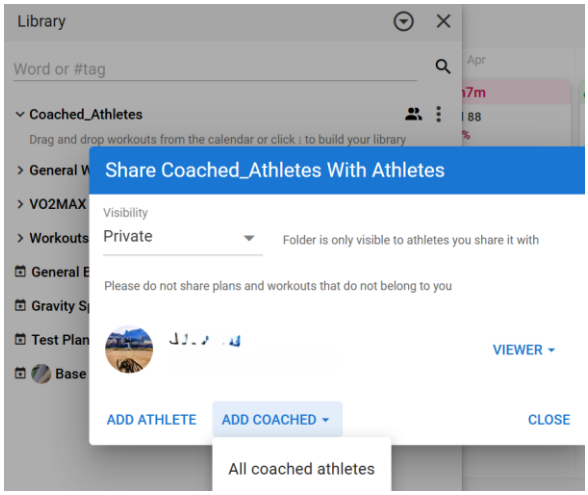


- Go to **Library**
- Create a folder named:

Coached_Athletes

✓ Name must match exactly

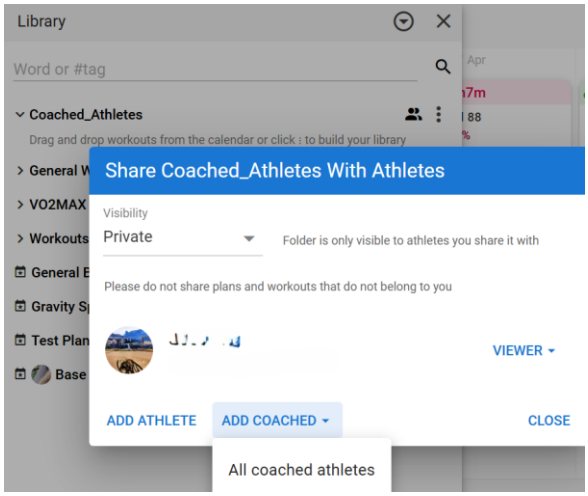
2️⃣ Set Folder to PRIVATE (MANDATORY)



- Open sharing settings
- Set:

Visibility = Private

3️⃣ Share folder with Your Coached Athlete



- Click **Add "all Coached Athletes" – or add them individually**
- Add your coached athlete (e.g. *Coached Athlete*)
- Permission: **Viewer**

4️⃣ Athlete Connects

The Coached Athlete must go to:

https://intervalsicugptcoach.clive-a5a.workers.dev/app

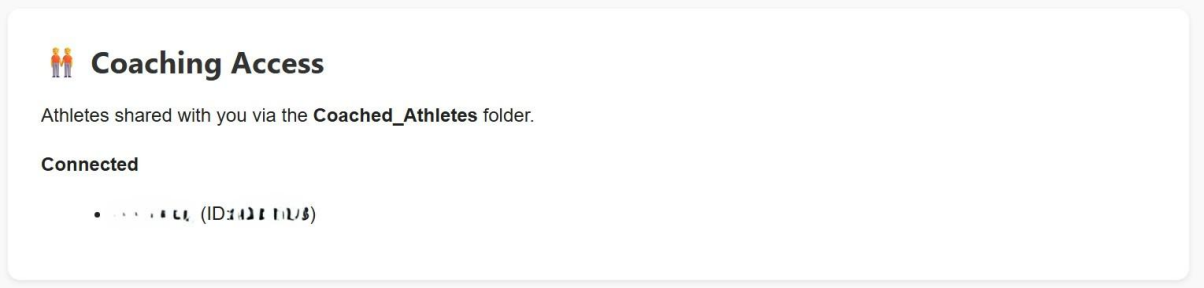
- Click **Connect Intervals**
- Authenticate with OK – nothing else is needed.
- This is to allow the Coach to see the Athlete data (just like in Intervals.icu)

5️⃣ What the Coach Sees

The Coach must go to:

https://intervalsicugptcoach.clive-a5a.workers.dev/app

- Click **Connect Intervals**
- Authenticate with OK – nothing else is needed
- Coach then sees a list of coached athletes



- A **Coaching Access** section appears
- Shows: Connected and Disconnected Coached Athletes - Name & ID: XXXXXXX

🔐 Security Model

This is **not just folder sharing**.

Access requires BOTH:

✓ Folder Rule

- Athlete is in Coached_Athletes
- Folder is **PRIVATE**

✓ Authentication Rule

- Athlete has connected via the app

🚫 If Athlete Disconnects

- They are **removed immediately from Coaching access.**
- Even if still in the folder in intervals.icu

✓ **Important**

- Only authenticated athletes appear
- Only coached athletes you explicitly share are visible
- Athletes cannot see each other outside this controlled setup

---

Bottom line

If it’s not working, one of these is wrong:

- Folder name
- Athlete not shared
- Athlete not connected

WORKS ONLY with

run weekly report for athlete ID 1234567 (with ISO start date optional)*
run wellness report for athlete ID 1234567
run season report for athlete ID 1234567*
run annual summary report for athlete ID 1234567 (with start/end optional)

*lite option also for reduced payload
